Experience

Company A – City, Region

Month Year – Present

Senior Software Engineer

- Chose [design] over [alternative] for [workflow] because [constraint]; validated [latency, correctness, or capacity requirement] with [test] before rollout.
- Migrated [service or data store] using [staged rollout] and [rollback condition]; reconciled [records or outputs] to verify [correctness requirement] before retiring the old path.
- Traced [recurring production failure] to [cause], changed [component], and added [regression test and alert]; [production check] confirmed [specific result].
- Coordinated [API or schema change] with [dependent teams], documented [compatibility contract], and verified [consumer behavior] before removing [legacy interface].

Company B – City, Region

Month Year – Month Year

Software Engineer

- Built [feature or service] for [user workflow], handling [failure or edge case] with [validation or recovery behavior]; checked [acceptance criterion] in [test or production].
- Profiled [slow request or job], traced [bottleneck] to [cause], and changed [implementation]; measured [before and after] under [the same load or dataset].
- Added [test or release check] after [escaped defect], reproduced [failure condition], and verified [fix] across [affected versions or clients].

Skills

- Languages:** [Language], [Language], [Language].
- Systems:** [Framework], [Database], [Cloud or Runtime].
- Tooling:** [Testing], [Observability], [CI/CD].

Education

Dalhousie University – Halifax, NS

January 2019 – December 2022

BS Computer Science
