Experience

Company A – City, Region
Software Engineer

Month Year – **Present**

- Built [workflow] with loading and failure states, preserved [user input] after failed requests, and tested the retry path.
- Fixed [keyboard or screen-reader barrier] in [flow]; checked focus order, accessible names, and error announcements with [test method].
- Traced [recurring failure] to [cause], fixed [component], and added a regression test covering [trigger].
- Profiled [slow interaction], changed [rendering or loading behavior], and compared [timing] on [the same device and test case].

Company B – City, Region
Software Engineer

Month Year – **Month Year**

- Added validation to [form], mapped server errors to the affected fields, and tested [invalid and corrected submissions].
- Replaced [duplicated UI] with [shared component], kept [existing behavior], and tested its use in [two distinct workflows].
- Shipped [change] behind [flag or staged rollout], checked [success signal], and documented [rollback trigger].
